xm radio has been an incredible advance in media communications. I stopped listening to the radio all together because of the numerous advertisements which decreased the amount of music or news I was able to get at a convenient time. Now that I have xm, I actually turn my television off to listen to the radio. My parents thought they would never see the day that would happen. XM is the future of radio and the future is here, and it should not be impeded by staunch adherence to the inefficient, impractical ways of the past. Allow XM to continue to decide what to broadcast instead of the NAB, please reject 04-160.  
Respectfully,

E. Hunter Pierce, D.M.D.
